PRIS-SPCLS Training workshop

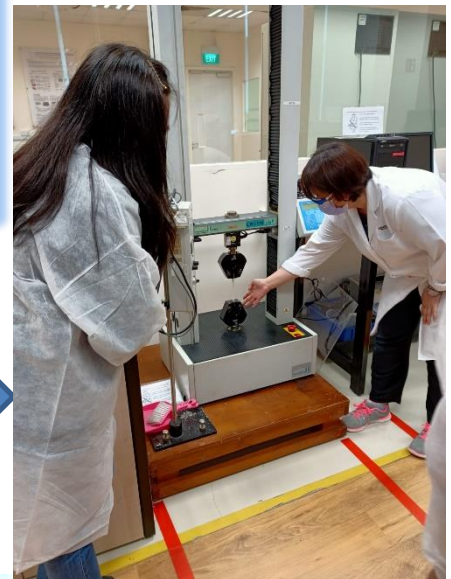

On 31st March and 1st April 2021, PRIS and Singapore Polytechnic School of Chemical & Life Sciences (SP-CLS) has jointly organized the Fifth run of training course on Applied Polymer Material Technologies and Processing Techniques Training. We have additional practical training on mechanical testing this round.

Top: Dr Zhao giving the first session of training after the safety briefing section.

Left: Participants are concentrating on learning the injection molding operation from training instructor, Mr. Tan Peng Saw, SP.

Right: Participants are learning and practicing on tensile testing guided by Dr Ng, SP.

Your contributions are appreciated:
